

# Armstrong DYNAMAX™ | 707 | ZipTwo® | Remote Power | DYNAMAX™ Suspended Ceiling Clip | vodeCONNECT™

Please read instructions in their entirety before proceeding with any part of the installation. This product must be installed in accordance with the applicable installation code by a person familiar with the construction and operation of the product and the hazards involved. Consult a qualified electrician to ensure correct branch circuit rating. To prevent electric shock, disconnect all power before installing or servicing product. Rated for use in dry and damp locations only. Retain instructions for future reference.

Technical Support: 707.996.9898 or technicalsupport@vode.com

## ZipTwo Joiner

A Joiner clip is provided to align rails for a continuous ZipTwo system. Install Joiner clips to rails before mounting rails to the mounting clips.

#### **Fixture Orientation**

Power feeds come out of the bottom of the fixture as shown. Refer to Power Feed Distance Table for dimensions from power feed to end of fixture.

## Power Feed Distance From End of Fixture

Sensor	Sensor Power Feed	Fixture Power Feed
Enlighted Micro Sensor	2.7" (68.6 mm)	6.2" (157.5 mm)
Encelium SensiLUM	2.7" (68.6 mm)	6.2" (157.5 mm)
Legrand Wattstopper	2.7" (68.6 mm)	6.2" (157.5 mm)
Lutron Athena	2.7" (68.6 mm)	6.2" (157.5 mm)
Lutron Vive	2.7" (68.6 mm)	6.2" (157.5 mm)
nLight Air	2.7" (68.6 mm)	6.2" (157.5 mm)
nLight Wired	5.3" (134.6 mm)	9' (228.6 mm)

## Sensor Power Cable Type

Sensor	Sensor Power Cable Type
Enlighted Micro Sensor	Cat 5e Cable
Encelium SensiLUM	4 Conductor Wire Harness
Legrand Wattstopper	2 Conductor Wire Harness
Lutron Athena	4 Conductor Wire Harness
Lutron Vive	2 Conductor Wire Harness
nLight Air	4 Conductor Wire Harness
nLight Wired	Cat 5e Cable

## Armstrong DYNAMAX™ Clip (*DM*)

#### **Step 1: Drill Wire Routing**

Using the Vode provided drilling guide, locate desired power location. Place guide into channel, as shown

#### Step 3: Assemble Clips

Assemble the clip, as shown below, by installing supplied screw into clip opening.

#### Step 2: Drill Wire Routing

Check width of your ZipTwo to ensure opening will be visually covered by rail. Refer to page two for ZipTwo power and sensor harness location. Consult system layout to ensure proper power harness locations.

Drill 0.5" (13 mm) opening at a 45° angle, using provided guide

Be sure to de-burr hole to ensure no damage is done to power harness.

### Step 4: Install Clips

Using a 3/16" hex key, install all clips to installed suspended ceiling system. DO NOT over tighten as this could deform the clip and not allow for installation.

Fixtures will be supplied with two clips for rails under 48", four clips for rails 48" to 72" and six clips for 96" rails. Position two clips 4" (102mm) from each end of the fixture and evenly space the remaining clips.

707 | ZipTwo | Remote Power | DYNAMAX™ Ceiling Clip | Installation Guide | vodeCONNECT™ | April 2024 | Rev A • 4 of 18

#### Step 4: Install Fixture

Determine fixture and sensor wire harnesses location and notch T-Bar/Panel, as necessary. Install driver and wiring per instructions (see appendix). Connect fixture and sensor wire harnesses to power wire harnesses. Insert fixture onto installed clips by inserting back edge of fixture to installed clips, then carefully snapping front edge on.

For multi-rail systems, see ZipTwo Joiner, page 2.

## Install Remote Linear Power Supply

**IMPORTANT!** Before installing any power supply, turn off electricity at circuit box.

Vode recommends keeping track of which lids comes with which housing, as the lid contains important installation labeling.

Using the indicated tab, remove power housing lid to access mounting points. Install power supply housing to desired surface using screws (*provided by others*). Run line, ground and neutral wiring and any applicable dimming controls into power housing through any provided knockout and secure in place, using conduit as necessary per local coding. Use wire nuts (*provided by others*) to make a secure connection between all wiring. (*The provided wire leads are 18 AWG solid core*).

Refer to sensor manufacturer's install guide for detailed sensor calibration and configuration instructions.

**DO NOT** power on system until instructed.

For remote power supply maximum distance or other wiring questions, please consult Vode Power Guide.

**NOTE:** If power housing is supplied pre-wired with cord and plug and wire harness installed, skip above steps and power system when instructed by plugging system into a standard outlet.

#### Remote Driver Distance

All Vode linear remote drivers come in a 0.054" (1.4 mm) formed galvanized steel power supply housing with five (5) knockouts: (4) 1-1/8", (1) 7/8" and (1) 9/16". Power supply housing dimensions: 2 3/8" (56 mm) x 1 5/8" (33 mm) x 20 11/16" (525 mm)

Driver	Remote Distance
eldoLED	100' (30.5 m)
Lutron	See Power Guide
Magnitude	100' (30.5 m)
OSRAM	100' (30.5 m)

For other wiring questions and driver specific information, see **Vode Remote Power Guide**.

**Example Only**See Vode Remote Power Guide for wiring detail.

Sensor	Remote Distance
Enlighted Micro Sensor	100' (30.5 m)
Encelium SensiLUM	100' (30.5 m)
Legrand Wattstopper	100' (30.5 m)
Lutron Athena	100' (30.5 m)
Lutron Vive	60' (18.3 m)
nLight Air	100' (30.5 m)
nLight Wired	100' (30.5 m)

## **Troubleshooting Guide**

#### My fixture will not turn on:

Check all wiring is correct and all connections are fastened properly.

If all wiring is correct, remove fixture and connect it to a known working driver. If the fixture lights up, then the problem is with the installed driver or wiring:

- 1) Check line voltage to driver is present.
- 2) Check driver wiring (see **Vode Power Guide** for details) and check wiring to fixture.

If fixture still doesn't light up, check that all dimming wires are installed correctly. Reversed polarity on any driver will cause the entire system to not work, (see **Vode Power Guide** for wiring details).

#### The fixture is not dimming properly:

Check all wiring is correct and all connections are fastened properly.

Check driver and sensor control wiring (see **Vode Power Guide**, **vodeCONNECT Brochure**) and the sensor control manufacturer's website for further details).

For any help with installation or technical information, contact Vode Tech Service at 707-996-9898.

## **Important Notes**

- Listed to UL standards for damp location by a Nationally Recognized Testing Laboratory (NRTL) recognized by OSHA
- Power Type: Class 2 (<60v) constant current driver.
- Dimming curve is factory preset to linear. Logarithmic is available upon request. See Vode Driver Guide for specific details and wiring diagram.
- Unless specified, one driver and one sensor per rail will be supplied.
- Please consult sensor manufacturer's product technical sheets for additional information.
- 5 Year Limited Warranty. All material and component parts manufactured by Vode are guaranteed to be free from defects of material and/or workmanship for a period of 5 years from date of sale. Product must be installed according to Vode installation instructions and accepted trade practices. Power supplies and other auxiliary equipment are not covered under Vode warranty but may be covered by separate OEM warranty.
